DETAILED ACTION

Claims 1-12 are pending in the instant application.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a method for inducing *in vivo* migration of progenitor cells transplanted to the brain, classified in class 424, subclass 93.1.
- II. Claims 7-12, drawn to a method for inducing *in vivo* proliferation of progenitor cells transplanted to the brain, classified in class 424, subclass 93.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are patentably distinct because the inventions are drawn to mutually exclusive methods that require different method steps and produce different effects. The methods are mutually exclusive because the method of the invention of Group I requires that the mitogenic growth factor be infused at a second locus of the brain (relative to the locus where the progenitor cells are implanted), whereas the method of the invention of Group II requires that the mitogenic growth factor be infused at or near the locus of the brain where the progenitor cells have been implanted. The specification teaches that the implanted cells migrate toward the locus where the mitogenic growth factor is present. Thus, the method of the invention of Group II would not induce cellular migration, whereas the method of the

Art Unit: 1632

invention of Group I would. While both methods may induce proliferation, the method of the invention of Group II clearly would not induce cellular migration. The methods of the inventions of Groups I and II are not disclosed as being used together. Thus, the method of the invention of Group I is patentably distinct from the method of the invention of Group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter and because the searches required for the separate inventions are not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
